

RECOMMENDATION LETTER

JOANA LIMA

I write this letter as a former supervisor of her internship in Delta Soluções – web company based in Lisbon, Portugal.

Joana made her internship during her last year of university which by itself demonstrates her strong will in developing her own capacities, empower her know how and gain a competitive advantage towards other students. This is even more critical in IT market.

Joana is proactive, solution seeker and hardly declines a challenge. She's also a team player and has great communication skills. During her internship she also "mentored" other students.

I would say that her best asset might be the willing to continuously learn and improve her own capabilities. The quality of her work highly improved in just a few months.

I strongly recommend Joana for webdevelopment work and I'm sure she will exceed the expectations.

Lisbon, 5th of September, 2016.
