Portuguese - Native Proficiency

English - Professional Working
Proficiency

ABOUT ME

I'm an ambitious problem solver with passion for web-design and who would like to join a team of like-minded developers.
I have a keen interest in technology, user interface and user experience and I'm continually evaluating and upgrading my skills so I can stay at the cutting edge of web-development. I always take responsibility of my own personal development and I always try to find logical and innovative solutions .

The languages I love and I am more confortable with are HTML5, CSS3, JavaScript, PHP and Java, but I'm always ready to learn new languages and technologies.

As a person I see myself with a very good sense of humor and easy to get along. I like to spend time with my friends, travel, go to the movies, watch footbal, play volleyball, dance, listen to music and cook!

EDUCATION

Degree in Computer Science
Faculty of Sciences - University of Lisbon
07 / 2016
Addressed technologies:
- C, Java, Python, HTML, CSS, PHP, Javascript and MYSQL

Web Design for Everybody (Basics of Web Development and Coding)
University of Michigan (Coursera.org)
This Specialization covers how to write syntactically correct HTML5 and CSS3, and how to create interactive web experiences with JavaScript.
Course 1 - Introduction to HTML5

10/16
06/18

Openet   https://openet.com/

Software Engineer I (02/2017-06/2018)
- Joined the Engineering department
- Worked on multiple projects (as backend and front-end developer and tester) using
    - Java, AngularJS, Angular Material, HTML, CSS, Javascript, Github, JIRA
- Use Agile, build system components, create automated tests using ATF,
Selenium and write documentation

Graduate (10/2016-01/2017)
- Joined Openet for the Graduate Programme
    - Training and 4 weeks rotation in each of the tech department

10/15
06/16

Delta Soluções   http://deltasolucoes.com/en/

Junior Web-Developer and Junior Project Manager
- Follow the Senior Project Manager to all the client meetings to
    - Define the project and time estimates
    - Show the project progress and get client feedback
    - Show and deliver the finalised projects
- Development and maintenance of WordPress web-sites using **Beaver Builder, PHP,
Javascript, HTML5, CSS3, SCSS and MySQL**
- Development and maintenance of Prestashopweb-site.

**University
Projects**

Final Project - Online ticketline
UI Designer, Developer
- The goal of the final project is to give students an idea of a real world project from
concept to finish.
- The project was the developemnt of an online ticketline like ticketmaster.com. Our
goal was to create a user friendly application both regarding the interactivity with
the user and giving attention to the little details to make it appealing.
- As one of the UI designer I helped doing the front-end screens as I have a keen
eye to detail.
- As one of the developers I helped developing the front-end based on the designs
made.

Introduction to Web Technologies - Memory Game
Web Developer
- The goal of this project was to develop a web based memory game using HTML,
CSS, JavaScript and Bootstrap.

Web Applications and Services - Cultural WebSite
Web Developer
- The goal of this project was to develop a web site where would be displayed all
the information about cultural events, from art exhibitions to music festivals.
- As the lead web developer of the project I designed the UI of the web-site, always
having in consideration the opinions of the other team members, and helped
develop the front-end of the website.
- In the back-end I helped creating queries to insert the data into the database.
