To whom it may concern:

I am writing this letter to recommend Joana Lima. Joana worked with me at Openet for ±2 years. We worked together on developing a mobile application of which I was the technical lead on the project. It was and absolute pleasure working with Joana and assure you that Joana is an excellent Software Engineer and highly skilled in web development.

Joana is an excellent team member and works in coordination with rest of the team. She encourages other team members to achieve their targets. Joana has excellent communication skills and has the ability to share knowledge constructively with other team members. Although these are very strong qualities that Joana possesses, her biggest strength to the software department was the ability to make everyone around a better software engineer.

In closing, let me say I have no hesitation in recommending Joana for any position pertaining to software development. I feel confident she would be an asset to your organization. If at anytime you wish to discuss my relationship with Joana please feel free to contact me at email address listed above.

Johan Pieterse,
Lead Engineer,
Openet.
